Spring Semester 1998

Wednesday 10th February
> Mark Harman (Department of Mathematical and Computing Sciences, Goldsmiths College, University of London)
> **Program Slicing**

Wednesday 24th February
> Chris Williams (Division of Informatics, University of Edinburgh)
> **Belief network models of images**

Monday 8th March
> Julian Bradfield (LFCS Edinburgh, BRICS, Aarhus)
> **Alternation in the modal mu-calculus**

Wednesday 10th March
> Professor John A. McDermid (High Integrity Systems Engineering Group, University of York)
> **Safety-critical computing for aerospace in the next millennium**

Wednesday 24th March
> Professor Mahesan Niranjan (Department of Computer Science, University of Sheffield)
> **Use and Abuse of Neural Networks**

Wednesday 14th April
> Carole Goble (Department of Computer Science, University of Manchester)
> **TAMBIS: Transparent Access to Multiple Biological Information Sources**

Wednesday 21st April
> Leslie Smith (Department of Computing Science and Mathematics, University of Stirling)
> **Neuromorphic Systems**

Wednesday 28th April
> Andy Wright (Sowerby Research Centre, British Aerospace PLC)
> **From Springs and Dampers to Measures of Flocking Complexity**

Wednesday 5th May
> Professor Margaret Boden (COGS, University of Sussex)
> **Is Metabolism Necessary?.**
