

Instructions for running CZero Tool in Eclipse:

- Download the attached **Czerov2.zip**
- Extract the folder
- Go to **Eclipse**
- Go to: **File -> Import**

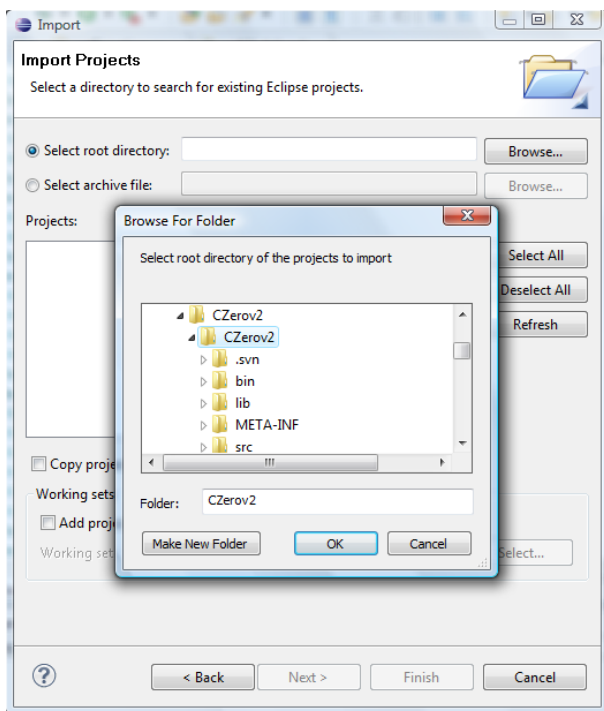

- Under "**General**" tab, select "**Existing Projects into Workspace**"

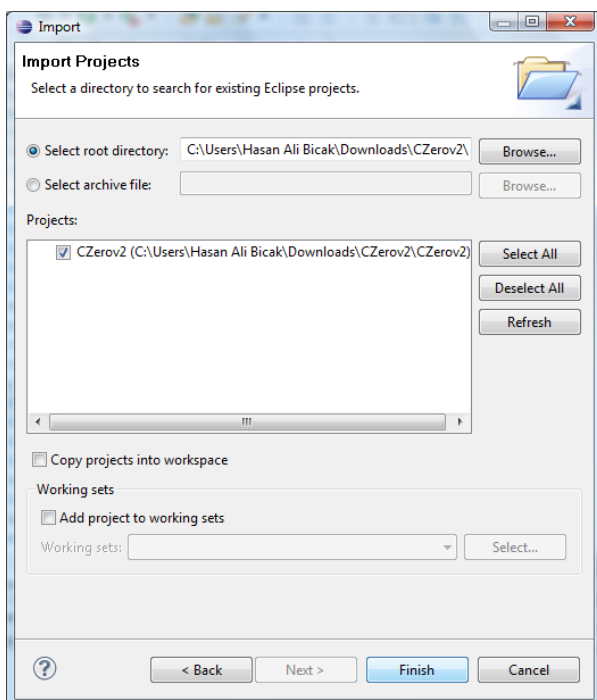

- Click **Next**

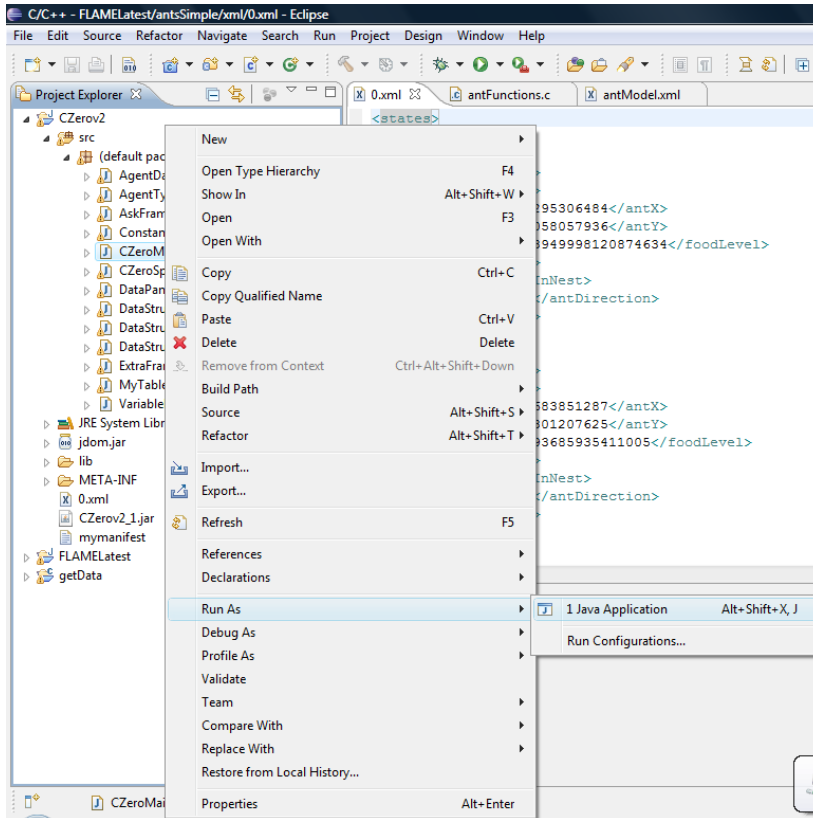

- Choose **"Select directory"** and click **Browse**
- Go to where you extracted the zip file and click on the **second "Czerov2"** folder

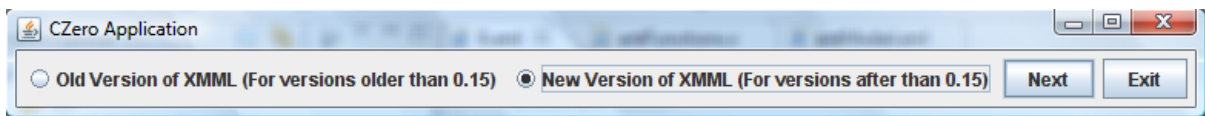

- Tick the box under that comes up under **Projects**
- Click **Finish**

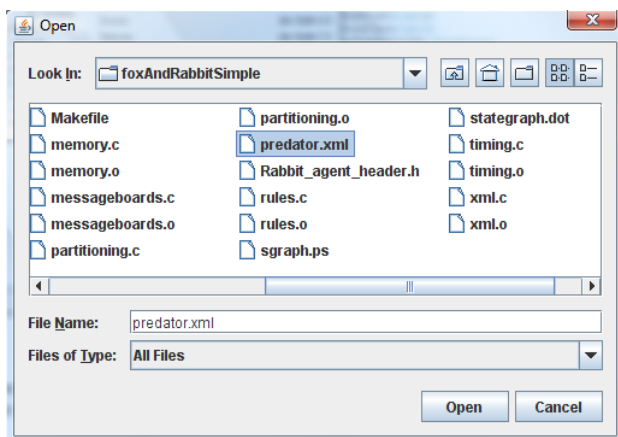

- Under **Project Explorer**, click on **CZerov2**, then **src**, then **(default package)**
- Right-click on **CZeroMainTest.java**
- From the pull-down menu go to: **Run As -> Java Application**

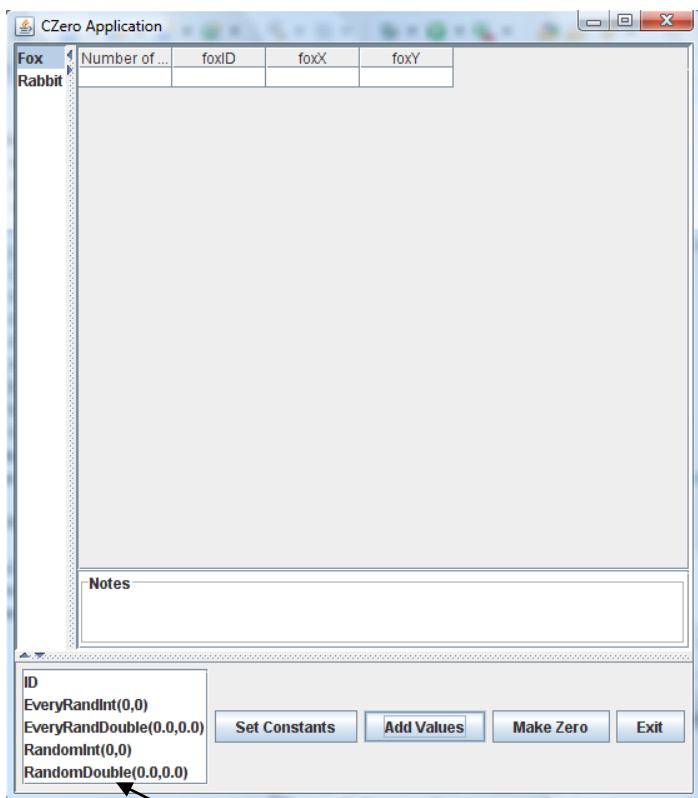

- Select **“New Version of XMML”**
- Click **Next**

- Find the path to your **model.xml** file (i.e predator.xml for Fox and Rabbit model)
- Click **Open**

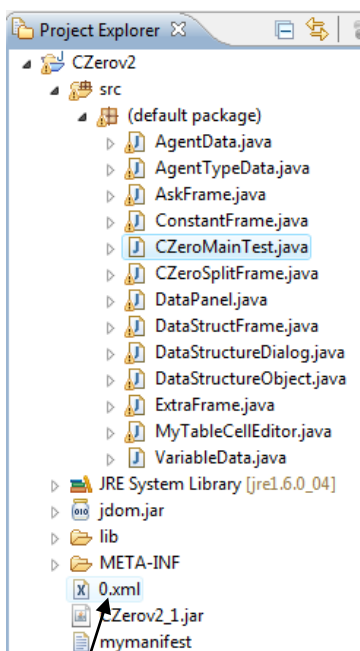

- Click **Add Values** and **fill in the table** for your agents

Make use of these

- Make sure to use **"Tab"** button when typing attributes
- Check **Notes** for **"Value updated"** message
- Once you are done filling up the table, click **Make Zero**, then **Exit**

This is the 0.xml you created
